

pbxnsip

Top System proudly announces software Distribution contract, covering Belgium, France, Luxembourg and Morocco, for the revolutionary Pbxnsip IP PBX product.

In order to meet the growing needs of businesses, the new Pbxnsip solution is complete, reliable, and totally secure

Brussels 11th June 2009 - Top System software house, Microsoft Gold Certified Partner and specialist for more than twenty years in windows application development, integration and consultancy, is proud to announce his distribution agreement of Pbxnsip, for Belgium, Luxembourg, France and Morocco.

After two years poor experience with other IP PBX products, Top System approached Pbxnsip, and found happiness with the Pbxnsip software. Being easy to install, configure and integrate this product with Avonca made it a very easy decision to take over the distribution contract and work closely with Pbxnsip in order to meet the demands of the ever growing marketing in France, Belgium, Morocco and Luxembourg.

With the help of Pbxnsip, Top System has successfully integrated his two remote sites in Brussels, Casablanca, and their home workers. This will be the benchmark to demonstrate the product to the Top System channel and existing Avonca users.

Convinced of the possibilities offered by the product, Top System aims to offer its resellers, a French and Dutch application, with full pre and after sales support, training and consultancy on integrating Pbxnsip with other applications.

After being one the first company to use the electronic identity card (eId) in its applications, and to secure websites, Top System is happy to integrate the worlds of telecommunications and applications. In its software package for the lawyers, "Avonca", with a simple click, the lawyer has access to all the records and customer's history with who he is in communication. With same simplicity, he can call any customers. Fewer errors, less time, more productivity!

Top System will be present at the conference "Day of the lawyer and the right" which will take place in Brussels the 17th September, to present the CTI integration between Pbxnsip & Avonca.

About Pbxnsip

Pbxnsip (www.pbxnsip.eu.com) makes SIP-based Private Branch Exchange (PBX) telephone systems. The Session Initiation Protocol (SIP) is used to talk to attached devices like telephones, PSTN gateways and SIP service providers. The Pbxnsip PBX is used to put the components from different vendors together in an enterprise communication system. Customers benefit from a modern PBX feature set that includes mobility support, computer telephone integration, and vendor independency. Pbxnsip also respects the security requirements of a business critical application. Customers may run the PBX on Microsoft Windows, Mac and Linux-based servers and on embedded appliances. Pbxnsip Inc was incorporated in 2005 and is located in Andover, Massachusetts, USA and Pbxnsip Europe Ltd was created in 2008 and is located in Leeds, United Kingdom.
